Description

Dear Tim Developer mohon support nya untuk perbaikan pada menu Generate absen quota Cuti karena Failed dengan errornya Ext.Ajax.request.failure pada saat execute

The screenshot shows the ROHTO HRIS application interface. A modal dialog box is displayed in the center, containing the text: "remote.minovais.com:31121 says Ext.Ajax.request Failure" and an "OK" button. The background shows the application's main form for generating absence quotas. The form includes fields for "Employee Type", "Employee Sub Type", "Payroll Grade From", "Payroll Grade To", "Employee ID From" (with value 00000001), and "Employee ID To" (with value 00000010). There is an "Execute" button at the bottom right of the form. Below the form, a "Result" section is visible, showing a table with columns: Start Date, End Date, Absence Quota Type, Employee ID, Full Name, Start Deduction, End Deduction, Original Quota, Remaining Quota, and Note. The table currently displays "No Data Display". The left sidebar contains the "HRIS Menu" with various options like "My Workplace", "Master Data", "Human Resource", "HR Administration", "Time Management", etc. The top of the page shows the "minovais" logo and a "Not secure" warning in the browser address bar.

Console What's New x

Highlights from the Chrome 68 update

- Eager evaluation
Preview return values in the Console without explicitly executing expressions.
- Argument hints
View a function's expected arguments in the Console.
- Function autocompletion
View available properties and methods after calling a function in the Console.

#2 - 02/19/2021 09:58 AM - Muhammad Bintar

- File Panduan Generate Absence Quota1.mp4 added

Update :

1. Meng hide Filter StartDate Deduction dan EndDateDeduction
2. Membuat Default Value 0 pada StartDateDeduction dan EndDateDeduction

Berikut Panduan nya supaya tidak error lagi.
