Fixing :

1. Tambahkan FamilyType di table hr_cust_md_conf_sub

md_type		hr_cust_m...	☒			= 'empmd0...

100	empmd0007	06	N3	0
100	empmd0007	07	N3	0
NULL	NULL	NULL	NULL	NULL

2. Update Development Workbench - HR_APP - fnGenMD : rubah isi fnGenMD sesuai file terlampir, sesuai gambar dibawah,

The screenshot shows the MinovaERP Development Workbench interface. The sidebar on the left contains a menu with categories like HR Administration, Organization Management, and HR Planning & Development. The main area displays a list of objects under the HR_APP category. The right-hand panel shows the configuration for the selected object, fnGenMD. The configuration includes fields for Object Name, Object Class, Object Type (set to CODE), and Input Param (set to mdcode). The Code field contains a JavaScript function. Annotations with green boxes and arrows point to specific steps: 1. Pili HR_APP (pointing to the HR_APP object in the list), 2. Pili fnGenMD didalam folder Code (pointing to the fnGenMD object in the list), and 3. Rubah isi dengan file terlampir (pointing to the code editor area).
