update:

ini terjadi karena employee tersebut ada 3 data dimana salah satu nya diisi birthdate yang berbeda.

The screenshot shows the Microsoft SQL Server Enterprise Manager interface. The top menu bar includes File, View, Project, Debug, Query Designer, SQL Prompt, Tools, Window, and Help. The main window is divided into several panes:

- Object Explorer:** Displays a tree view of the database structure. The 'Tables (filtered)' folder is expanded, showing a list of tables including 'System Tables', 'FileTables', and various 'dbo.hr_md_emp_md' tables. The table 'dbo.hr_md_emp_md0001' is selected.
- Query Designer:** Shows a grid for building a query. The columns are: Column, Alias, Table, Outp..., Sort Type, Sort Order, Filter, Or..., Or..., and Or... The 'Filter' column contains the expression '= '20050963''. The 'Table' column lists the tables involved in the query: 'landscape', 'emp_id', 'start_date', 'end_date', 'full_name', 'nick_name', 'external_id', 'first_title', 'last_title', 'gender', and 'birth_date'.
- Results:** Displays the query results in a table. The columns are: e, nick_name, external_id, first_title, last_title, gender, birth_date, birth_place, nationality, ethnic, and religion. The results show three rows of data, with the 'birth_date' column highlighted by a red rectangle.
