## Description

Dear tim developer mohon support nya untuk perbaikan pada ess address dimana jika melakukan edit data address pada history sebelum nya, maka data address tersebut tidak terposting ke master data address.

The screenshot shows a web application interface for HR-ESS. The top navigation bar includes 'My Workplace', 'Master Data', 'Human Resource', 'Business Intelligence', and 'System Administration'. The main content area displays a form for creating or editing a request. The 'Requester ID' is 000002T2, and the 'Requester Name' is FANI AULIA RAHMAN, S.T. The 'Subject' and 'Description' fields are empty. Below the form is a 'Body' section with a 'History' table. The table has columns for 'Start Date', 'End Date', 'Address Type', 'Address', 'RT', 'RW', 'Kelurahan', 'District (Kec)', 'City', 'Province', and 'Country'. The table contains three rows of data. A red box highlights the table, and a red arrow points to it with a note: 'Jika di double klik maka data tersebut tidak terposting ke master data jika di approve oleh atasan'. Below the table is an 'Input' section with fields for 'Start Date', 'End Date', 'Country', and 'Postal Code'.
