

BANK KALTENG - Bug #3083

Generate Plafond masih 0 padahal harusnya tidak

Description			
Dear Azid,			
Ketika saya klik button Generate Plafond (ketika create Medical Master Data) amount Plafond nya masih 0 (seperti di foto yang saya attach), padahal harusnya tidak. Harusnya dia terisi angka sesuai dengan yang telah di-mapping di Customization (Medical -> Plafond).			
Contoh misalnya Treatment Type 01 (Rawat Inap) disitu dia tidak ada mappingan spesifik sesuai Payroll Class, Payroll Type, Payroll Area, dsb. Maka artinya itu berlaku untuk semua karyawan. Maka harusnya ketika diklik Generate Plafond hrsnya muncul amount sesuai yang telah di-mapping di kolom Fixed Value di Customization.			
Menu Path: Human Resource > HR Administration > Benefit Administration > Medical > Medical Master Data			
Port: http://remote.minovais.com:31130/

dear haykal , ini ada settingan atau flag yang kurang

pada mappingan di PHRBNMEDTREATPLAF jika ingin sesuai fixed value pada table tersebut flagnya ada di field PlafondCalculationType 1 itu artinya true sedangkan 0 itu artinya false seperti source di bawah ini

```
if (EPhrBnMedTreatPlaf.Count() > 0)
{
    foreach (var Items in EPhrBnMedTreatPlaf)
    {
        #region Set parameter dan default data
        string TreatmentType = Items["TreatmentType"].ToString();
        bool PlafondCalculationType = Items["PlafondCalculationType"].ToString() == "1" ? true : false;

        Dictionary<string, object> MedicalResult = new Dictionary<string, object>();
        MedicalResult.Add("EmployeeID", EmployeeID);
        MedicalResult.Add("HeaderSequence", HeaderSequence);
        MedicalResult.Add("TreatmentType", TreatmentType);
        MedicalResult.Add("MedicalFamily", "0001");
        MedicalResult.Add("PlafondUsed", 0);
        MedicalResult.Add("Sequence", "");
        #endregion

        #region Fixed nilai kalkulasi
        if (PlafondCalculationType)
        {
            var FixedValue = Items["FixedValue"].ToString();
            decimal FixedValueAmount = 0;
            decimal.TryParse(FixedValue, out FixedValueAmount);
            decimal Number = (decimal)Items["Number"];
            decimal NilaiPlafond = FixedValueAmount * Number;
            MedicalResult.Add("Plafond", NilaiPlafond);
            MedicalResult.Add("PlafondRemain", NilaiPlafond);
            ListMedicalResult.Add(MedicalResult);
            continue;
        }
        #endregion
    }
}
```

ini contoh di bawah yang settingannya udah di ubah jadi 1

Maintain Medical Master Data - 00000029 - NUSITA KAROLINA,S.Sos

Medical Plafond

Generate Plafond Delete

	Treatment Type	MedicalFami...	Plafond	Plafond Re...	Plafond U...
1	Rawat Inap	Karyawan	1,000,000,000.00	1,000,000,000.00	0.00
2	Rawat Jalan	Karyawan	1,000,000,000.00	1,000,000,000.00	0.00
3	Kacamata (Frame)	Karyawan	0.00	0.00	0.00
4	Kacamata (Lensa)	Karyawan	0.00	0.00	0.00
5	Bersalin	Karyawan	0.00	0.00	0.00
6	Cuci Darah	Karyawan	1,000,000,000.00	1,000,000,000.00	0.00

tapi settingannya udah di kembalikan ke 0 biar ubah sendiri aja sesuai apa yang di mau

makasih
