Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour

Description

Dear Tim Developer,

Saat ini setelah login berhasil, sistem menampilkan popup "Login Verified – You have successfully logged in" dengan tombol Continue.

Hal ini menambah langkah yang tidak diperlukan bagi user karena:

- Status berhasil login sudah jelas bila user langsung diarahkan ke halaman utama/dashboard.
- Popup success seperti ini hanya menambah 1 klik tambahan (redundant step).
- User expectation: hanya error yang perlu ditampilkan, bukan success confirmation.

Acceptance Criteria:

- Hapus popup "Login Verified" setelah login berhasil.
- Setelah login sukses, user langsung diarahkan ke halaman utama/landing page.
- Pesan error hanya ditampilkan bila login gagal.

Mockup (Usulan):

- Login sukses → langsung redirect ke Dashboard/Home Page.
- Login gagal → tampilkan inline error message pada form login.
