- Assignee changed from Mr Dhafin to Mr Ikmal

dear ikmal dan dhafin berikutnya cara bikin async ya :

1. cek di direktori dia ada folder service atau tidak kalau tidak ada tambahin masukin kedirektori dia seperti di bawah ini

2. selanjutnya pilih async baru WorkFlowAsyncNew

3. setting db sesuai yang di inginkan caranya pilih (MinovaIS.MinovaES.WorkFlow.WinService.exe.config)
nanti bentuknya seperti ini buka di notepad++

```

1 <?xml version="1.0"?>
2 <configuration>
3   <configSections>
4     <section name="log4net" type="log4net.Config.Log4NetConfigurationSectionHandler, log4net" />
5     <section name="securityCryptographyConfiguration" type="Microsoft.Practices.EnterpriseLibrary.Security.Cryptography.Configu
6     <section name="MinovaDataAccess" type="MinovaIS.MinovaES.Data.Access.DataConfigSection, MinovaIS.MinovaES.Data.Access" />
7   </configSections>
8   <MinovaDataAccess DatabaseType="SQLServer" Server="." Database="MinovaES_KertasNusantara_Dev" User="sa" Password="MINOV@1s"/>
9   <connectionStrings>
10  </connectionStrings>
11  <appSettings>
12    <add key="DATABASE_TYPE" value="SQLSERVER" />
13  </appSettings>
14  <system.web>
15    <compilation debug="true" targetFramework="4.5" />
16    <httpRuntime targetFramework="4.5" />
17  </system.web>
18  <log4net>
19    <appender name="LogFileAppender" type="log4net.Appender.FileAppender">
20      <param name="File" value="Log.txt" />
21      <param name="AppendToFile" value="true" />
22      <rollingStyle value="Composite" />
23      <maxSizeRollBackups value="14" />
24      <countDirection value="1" />
25      <lockingModel type="log4net.Appender.FileAppender.MinimalLock" />
26      <layout type="log4net.Layout.PatternLayout">
27        <param name="ConversionPattern" value="%d [%t] %-5p %c %m%n" />
28      </layout>
29    </appender>
30    <root>
31      <level value="INFO" />
32      <appender-ref ref="LogFileAppender" />
33    </root>
34  </log4net>
35  <startup>
36    <supportedRuntime version="v4.0" sku=".NETFramework,Version=v4.0"/>
37  </startup>
38 </configuration>

```

4. terakhir bikin service untuk jalanin fungsinya caranya masuk cmd dengan run administrator terus setup seperti ini :

```
sc create MinovaES.WorkFlowAsyncNewKertasNusantaraDev binPath=
"C:\Webserver\KertasNusantara_Development\Service\WorkflowAsyncNew\MinovaIS.MinovaES.WorkFlow.WinService.exe\" DisplayName=
"MinovaES.WorkFlowAsyncNewKertasNusantaraDev" depend= Tcpip
```

note : !. MinovaES.WorkFlowAsyncNewKertasNusantaraDev ini penamaan jadi bebas

2. C:\Webserver\KertasNusantara_Development\Service\WorkflowAsyncNew\MinovaIS.MinovaES.WorkFlow.WinService.exe\ (ini direktori
asyncnya)

copy ke cmd run administrator dan enter kalau udah sukses cek di service windows udah ada apa belum

```
Administrator: Command Prompt
Microsoft Windows [Version 10.0.20348.4529]
(c) Microsoft Corporation. All rights reserved.

C:\Windows\system32>sc create MinovaES.WorkFlowAsyncNewKertasNusantaraDev binPath= "\"C:\Webserver\KertasNusantara_Development\Service\WorkFlowAsyncNew\MinovaIS.MinovaES.WorkFlow.WinService.exe\""" DisplayName= "MinovaES.WorkFlowAsyncNewKertasNusantaraDev" depend= Tcpip
[SC] CreateService SUCCESS

C:\Windows\system32>
```

5. cek di service windows kalau udah ada tinggal start
