- 1 . Check Table "select * from PHRPA0019 Where EmployeeID='00000320' and StartDate like '202112%'"
- 2 . Check Table "select * from MinovaAbsen.dbo.EmployeeHFI where NIK='00000320'"
- 3 . Check Table "select * from MinovaAbsen.dbo.attendance_karyawan where user_id='00000320' and year(tanggal)=2021 and month(tanggal)=12"
- 4 . EmployeeID PHRPA00001 di Minova Harus ada di MinovaAbsen.dbo.EmployeeHFI dengan nama Field NIK
- 5 . Data Di MinovaAbsen.dbo.attendance harus ada di MinovaES_HINO_Prod.dbo.PHRPA0019
- 6 . Jika MinovaAbsen.dbo.attendance & di MinovaES_HINO_Prod.dbo.PHRPA0019 Tidak sesuai Jalankan Service MinovaES_Hino_Finger (Restart)

Tetapi check dahulu Field "synced" pada table MinovaAbsen.dbo.attendance.

Data yang akan di proses Service adalah yang value "synced" !=1 (Bukan 1) jadi jika ingin di ulang ubah value ke 0 dulu lalu restart Service.

The screenshot shows the Windows Services console with the 'MinovaES_Hino_Finger' service running. The service is highlighted in red. The Properties dialog box is open, showing the service name, display name, and startup type (Automatic). The service status is 'Running'.
