Target version:		Spent time:	0.00 hour

Description

dear tim developer mohon support nya untuk perbaikan pada ESS PMS Goal Setting dimana pada saat memilih Appraisal Period tidak muncul nama appraiser nya, namun jika employee lain nama tersebut tampil.

sampel contoh employeeid 00000058

The screenshot shows the ROHTO web application interface. The left sidebar contains a menu with options like 'My Workplace', 'My Report', 'Request', 'HR Administrative...', 'Performance M...', 'Goal Setting', and 'Review 4'. The main content area is titled 'Body' and contains a form for 'Appraisal Type' and 'Appraisal Period'. The 'Appraisal Type' is set to '01 - Goal Setting' and the 'Appraisal Period' is set to 'G - 01 Jan - 31 Des'. The 'Appraisal Date' is set to '01/27/2022'. The 'Appraiser' section is highlighted with a red box, showing a table with one row: Appraisal ID 1, Appraiser Name Tham Muk..., KPI Weight 0, and Qualification 0.

update :

cek WFPMSDEFAULTAPPRG pada tabel CUSTPARAM

ubah lvalcount dari > menjadi >=

```

QualificationWeight_48 DECIMAL(18, 2),
Sequence_48 INT,
AppraisalType_48 VARCHAR(12),
EmployeeID_48 VARCHAR(8),
HeaderSequence_48 INT
);
DECLARE @lvlascound INT = CAST(@orglvl AS INT);
WHILE @lvlascound >= 0
BEGIN
    IF @poshead IS NOT NULL
    AND @emphead IS NULL
    BEGIN
        SET @emphead =
        (
            SELECT TOP (1)
                EmployeeID
            FROM dbo.PHRPA0055

```

=====

tambahkan baris pada gambar di bawah ini:

```

        SELECT TOP (1)
            EmployeeID
        FROM dbo.PHRPA0055
        WHERE Position = @poshead
        AND StartDate <= @now
        AND EndDate >= @now
    );
END;
IF @poshead IS NOT NULL
AND @emphead IS NOT NULL
AND @empid_requester <> @emphead
BEGIN
    IF (@dataseq = 3) BREAK;
    INSERT INTO @tableapv
    SELECT 'App' + CAST(@dataseq AS VARCHAR(4)) AS AppraiserNo_48,
        @emphead AS AppraisalID_48,
        CASE
            WHEN @dataseq = '1' THEN

```

artinya adalah jika data yang tampil pada query ini memiliki 3 sequence (dalam arti ini atasan), maka berhenti di sequence (atasan) ke 2 saja.
